ached a super slim, ideal for those who the move. The designed primarily it has a built in there is also a line MP4 player. e sleek 16mm thick e. A blue LED of the speakers are eged in it charges aneously as music nes with plug y standard British akes making these e taking on travels. ed in, it runs via s, rol comes in the

box, which can flick through your iPod, eliminating the need to remove your iPod to alter songs. A neoprene carry case is also included to minimise scratches and damage while transporting the system. Using the remote it is also possible to put your iPod on shuffle, repeat or loop. Additionally the speaker output 6W from two tweeters and 3W bass from two low resonance drivers. The speakers have fold out, fold in feet, where additional volume buttons are located. An on/off switch is located on the back of the speakers, or using the remote they can be put on stand by. Also located at the rear of the system, a USB port allows syncing with your PC/Mac.

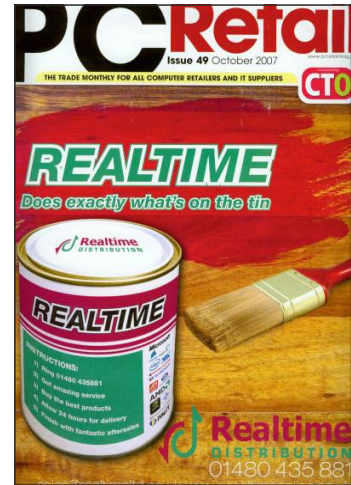

Unison launches iPod dock

THE Unison iPod dock allows the user to listen to music, view movies, music videos and digital images on your TV screen, computer or home sound system, all while charging and syncing with iTunes.

The glossy system features an infrared slim remote that can be used for volume control and to navigate play lists and galleries. This product has a 12 month warranty and costs £49.99 (SRP). This launch follows on from the Unison i-X5 speaker system, which hit retail last month in the UK.

The iPod dock charges your tunes while it fulfills your multimedia desires
